Subject: Microsoft Settlement

Honorable Judge,

It is my view that the proposed final judgment in the U.S. vs. Microsoft antitrust suit is seriously flawed. Microsoft is a convicted monopolist who has run afoul of this country's antitrust laws, making many billions of dollars in the process. This proposed settlement would allow the company to keep almost all of these illegal profits.

I am also concerned that there are no provisions in this proposed settlement to prohibit this monopolist from continuing to engage in anticompetitive activities. Allowing Microsoft to police itself is no solution, and we certainly don't need a government-mandated monopoly.

I urge you to reject the proposed final judgment.

Sincerely,

Anita Brubaker
